INTRODUCTION

Hi,

I am a designer that brings a unique blend of creativity and simplicity to every project. Gifted with intuitive understanding of spaces and behaviors, I can create smooth and logical experiences for clients and companies in homes, work environment, and in life events.

My passion for finding better ways of doing things drives me to push boundaries and shape impactful experiences.

PROFESSIONAL

Spatial Design and Planning:

- Expertise in spatial planning for diverse settings, including homes, offices, and salons.
- Proficiency in creating bespoke furniture solutions tailored to client needs and space requirements.
- Strong understanding of spatial dynamics and ergonomic principles to optimize functionality and aesthetics.

3D Modeling and UX visualisation:

- Advanced skills in 3D modeling and rendering software for creating realistic visualizations of interior spaces and furniture designs.
- Ability to develop detailed technical drawings and architectural plans to facilitate manufacturing and installation processes.
- Experience in utilizing graphic design tools to produce engaging UX solutions and communicate design concepts effectively.

Project Management and Collaboration:

- Demonstrated capability in managing complex projects from conception to completion.
- Track record of team leadership and collaboration, fostering a cohesive working environment.
- Strong communication and interpersonal skills to understand client's requirements and translating them into actionable plans.
